

## Restoring FM-750 Configuration

Restoring the FM-750 Configuration will restore from backup of all run time settings such as:

- Implement Setup
- EZ-Steer/EZ-Pilot Settings (including calibration)
- GPS Settings (Correction Source etc)
- Field IQ Settings
- Other Display and Guidance Settings
- This excludes autopilot configurations.

If you are restoring from USB, insert the USB Thumb Drive into the FM-750 and wait for the **USB icon** (Top Right) and the words **USB drive is ready for use** is displayed at the bottom of the screen (See first picture below).

	<p>Press the <b>Settings</b> Icon on the left of the screen.</p>
	<p>Press <b>System</b>. In the system menu press <b>Advanced</b>.</p>
	<p>Press <b>Save/Load Configurations</b></p>

<p><b>Save/Load Configurations</b> <span>?</span></p> 	<p>Press <b>Load a Configuration</b>.</p>
<p><b>Load a Configuration</b> <span>?</span></p> <p>demo</p> 	<p>Choose the Configuration you want to Load.</p> <p>Press the <b>Green Tick</b> to accept.</p>
<p><b>Load a Configuration</b></p>  <p>You are about to replace your current settings with those from a configuration file. Press the green checkmark to accept or the red X to exit.</p> 	<p>Press the <b>Green Tick</b> to override your current settings with the settings you have selected.</p>
<p><b>Save/Load Configurations</b> <span>?</span></p> 	<p>After a few seconds the configuration will be loaded and you will be returned to the <b>Save/Load Configurations</b> screen.</p>
