

Saving FM-750 Configuration

Saving the FM-750 Configuration will create a backup of all run time settings such as:

- Implement Setup
- EZ-Steer/Ez-Pilot Settings (including calibration)
- GPS Settings (Correction Source etc)
- Field IQ Settings
- Other Display and Guidance Settings
- This excludes autopilot configurations.

If you are saving to USB, insert the USB Thumb Drive into the FM-750 and wait for the **USB icon** (Top Right) and the words **USB drive is ready for use** is displayed at the bottom of the screen (See first picture below).

	<p>Press the Settings Icon on the left of the screen.</p>
	<p>Press System. In the system menu press Advanced.</p>
	<p>Press Save/Load Configurations</p>

	<p>Press Save Current Configuration.</p>
	<p>Press Save to USB drive.</p> <p>Press the Green Tick to accept.</p>
	<p>Using the on screen keypad, enter a name for this configuration to be saved as.</p> <p>When finished press the Green Tick to accept.</p> <p>Once the configuration has saved you will return to the Save/Load Configurations screen.</p>
